# RAMRAO ADIK INSTITUTE OF TECHNOLOGY

Affiliated to University of Mumbai • Approved by AICTE, New Delhi & DTE, Maharashtra

Ranked 198th in NRIF, 2020 by MHRD, New Delhi

## LETTER OF RECOMMENDATION

It is my pleasure to recommend Miss Pranjali Vinod Thakur for Master's program at your university. I have taught Pranjali Wireless Communication and Neural Network & Fuzzy Logic in 5<sup>th</sup> and 7<sup>th</sup> semester of her Engineering. Amongst all the subjects that I taught, I have seen her to be more inclined towards the practical application and system work.

I have also been her mentor during all her years in the college wherein I assessed her sound fundamental knowledge of not only electronics or hardware but also her efficiency in programming. When it was time to choose one of the elective subjects in final year, she decided to choose Neural Network & Fuzzy Logic which was opted by very few students because of its complexity. She can adapt to changing circumstances with remarkable comfort. She has hardly missed any of my lectures, and never shied away to ask questions and doubts.

During her tenure in this college, Miss Pranjali has been able to complete the Summer Internship Program (2018-2019) organized by the Department of Electronics Engineering which consisted of project and research work on the topic Wireless Charger. She has also attended various workshops in and outside the college related to different technologies such as Internet Of Things, Arduino, PCB Designing and Machine Learning & Artificial Intelligence. Along with this, she has published a conference paper in the International Conference on Automation Computing and Communication (ICACC2020) I which she successfully managed to study the ROS framework and implement autonomous navigation using turtlebot.

She has shown tremendous determination towards learning. Her abilities and performance strongly reflect her analytical attitude. I have known her long enough to gauge her strengths and weaknesses.

I strongly believe that this young lady with her diligence and hard work and her strong desire to learn new things will excel in her post graduation studies. Thus, I strongly recommend Pranjali for a Master's course at your university.

Regards,

Prof. Ganjanan Birajdar (M.Tech, Ph.D)  
Professor, Department of Electronics Engineering
