LETTER OF RECOMMENDATION

I am delighted to write this reference letter for Ms. Pranjali Thakur acquainting her to your renowned university. She joined NeoSOFT Technologies on 17th December, 2020 as a fresher out of college for the position of junior software developer and did assimilate well in a very short span of time. She has worked under my supervision in all projects and was quick at understanding the work requirements as a Blockchain developer and has project experience in public blockchains like Ethereum and Binance Smart Chain.

Pranjali has hands-on experience developing Solidity executable smart contracts and strong understanding of key blockchain elements such as crypto tokenomics, blockchain consensus protocols, P2P networks, cryptographic principles, key management and encryption algorithms. Furthermore, she has good knowledge of both front-end and back-end development which include things like creating interactive graphical user interface for Dapps, API handling, request handling etc.

When she started her job, she used to observe the procedures and asked the right questions to understand the whole system from its grassroots level and gradually started taking initiatives to improve the ways of working and timelines. She is also a proactive and a hardworking team player.

Moreover, she has done various process improvements to help the project and worked in the forefront to handle client and team queries. She always puts extra hours in order to meet deadlines and targets. She has provided valuable and critical audit evidences to client and has handled audits successfully. She has taken feedback and positively availed them as an opportunity for improvement and growth. Ms. Pranjali is of a congenial nature. She is sociable and shares a great rapport with her fellow employees as well as her seniors.
